ELSEVIER

Agricultural Water Management 70 (2004) 253–276

Agricultural
water management

www.elsevier.com/locate/agwat

Cumulative Subject Index, Volumes 64–70

Absciscic acid

Yield response of greenhouse grown tomato to partial root drying and conventional deficit irrigation, 69 (2004) 191

Acid export

The effects of a weir on reducing acid flux from a drained coastal acid sulphate soil backswamp, 69 (2004) 43

Acrolein

Irrigation of pepper plant (*Capsicum* sp.) with water containing acrolein, 67 (2004) 235

Administrative units

Using remote sensing data for water depletion assessment at administrative and irrigation-system levels: case study of the Ferghana Province of Uzbekistan, 64 (2004) 183

AGNPS validation

Validation of an agricultural non-point source model in a watershed in southern Ontario, 65 (2004) 59

Agricultural

Assessing microbial pollution of rural surface waters. A review of current watershed scale modeling approaches, (70) (2004) 1

Agricultural and urban runoff

Temporal variations in water quality of farm dams: impacts of land use and water sources, (70) (2004) 151

Agricultural watershed

Sediment flow behaviour from small agricultural watersheds, 67 (2004) 105

Agriculture

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 211

Agronomic efficiency

Analysis of irrigation systems and irrigation strategies for durum wheat in Tunisia, (70) (2004) 19

Agronomyron elongatum

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Alfalfa

Soil water balance simulation of alfalfa (*Medicago sativa* L.) in the semiarid Chinese Loess Plateau, 69 (2004) 101

***Allium cepa* L.**

Effects of water stress at specific growth stages on onion bulb yield and quality, 68 (2004) 107

***Allium sativum* L.**

Evapotranspiration and crop coefficients of irrigated garlic (*Allium sativum* L.) in a semi-arid climate, 64 (2004) 233

Alternate furrows-scientific scheduling

Examining traditional irrigation methods, irrigation scheduling and alternate furrows irrigation on vertisols in northern Ethiopia, 64 (2004) 17

Alternate wetting and drying

Rice root growth and nutrient uptake as influenced by organic manure in continuously and alternately flooded paddy soils, (70) (2004) 67

Approach-flow head loss

Field research on the performance of various drainage materials in Lithuania, 68 (2004) 151

Approach-flow head loss fraction

Field research on the performance of various drainage materials in Lithuania, 68 (2004) 151

Approach-flow resistance

Field research on the performance of various drainage materials in Lithuania, 68 (2004) 151

Aquatic herbicides

Irrigation of pepper plant (*Capsicum* sp.) with water containing acrolein, 67 (2004) 235

Aquifer contamination

Potential nitrate losses under different agricultural practices in the pampas region, Argentina, 65 (2004) 83

Arid areas

Sensitivity of evapotranspiration to global warming: a case study of arid zone of Rajasthan (India), 69 (2004) 1

Arid land crops

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97

Benefit cost ratio

Integrated farming approach for runoff recycling systems in humid plateau areas of eastern India, 64 (2004) 197

Bioenergetic

Deficiency of water can enhance root respiration rate of drought-sensitive but not drought-tolerant spring wheat, 64 (2004) 41

Black soil

Effect of cultural practices on soil properties, moisture conservation and grain yield of winter sorghum (*Sorghum bicolor* L. Moench) in semi-arid tropics of India, 64 (2004) 49

Blueberry orchards

Effect of irrigation on fruit production in blueberry, 67 (2004) 173

Bowen ratio

Evaluation of an enclosed portable chamber to measure crop and pasture actual evapotranspiration at small scale, 67 (2004) 15

Bowen ratio energy balance method

Changes in seasonal evapotranspiration, soil water content, and crop coefficients in sugarcane, cassava, and maize fields in Northeast Thailand, 67 (2004) 133

Calcium

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 121

Calibration

A wind-based qualitative calibration of the Hargreaves ET_0 estimation equation in semiarid regions, 64 (2004) 251

Canal

Comparative evaluation of canal seepage investigation techniques, 66 (2004) 65

Canopy conductance

On quantifying soil water deficit of a partially wetted root zone by the response of canopy or leaf conductance, 65 (2004) 21

Canopy stomatal resistance

Estimation of evapotranspiration, transpiration ratio and water-use efficiency from a sparse canopy using a compartment model, 65 (2004) 173

Canopy temperature

Evaluation of a crop water stress index for detecting water stress in winter wheat in the North China Plain, 64 (2004) 29

Capillary rise

Sugarcane water use from shallow water tables: implications for improving irrigation water use efficiency, 65 (2004) 1

Changes in seasonal evapotranspiration, soil water content, and crop coefficients in sugarcane, cassava, and maize fields in Northeast Thailand, 67 (2004) 133

Capsicum

Impact of drip and surface irrigation on growth, yield and WUE of capsicum (*Capsicum annum* L.), 65 (2004) 121

Carbon dioxide exchange rate

Impact of drip and surface irrigation on growth, yield and WUE of capsicum (*Capsicum annum* L.), 65 (2004) 121

CERES-Maize Model

Effective management of irrigation water for maize under stressed conditions, 66 (2004) 181

Chickpea

Water use efficiency of winter-sown chickpea under supplemental irrigation in a mediterranean environment, 66 (2004) 163

China

Runoff characteristics of artificial catchment materials for rainwater harvesting in the semiarid regions of China, 65 (2004) 211

Chloride

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 121

Chlorophyll concentration

Relationships among the leaf area index, moisture availability, and spectral reflectance in an upland rice field, 69 (2004) 83

Climate change

Adaptation to climate change to enhance food security and preserve environmental quality: example for southern Sri Lanka, 66 (2004) 15

Sensitivity of evapotranspiration to global warming: a case study of arid zone of Rajasthan (India), 69 (2004) 1

CO₂ enrichment

Interactive effects of elevated CO₂, nitrogen and drought on leaf area, stomatal conductance, and evapotranspiration of wheat, 67 (2004) 221

Coefficient of water-consumption

Irrigation and fertilizer effects on water use and yield of spring wheat in semi-arid regions, 67 (2004) 35

Confectionery groundnut

Irrigation scheduling of confectionery groundnut (*Arachis hypogaea* L.) in Senegal using a simple water balance model, 67 (2004) 201

Controlled deficit irrigation

Production and quality of the onion crop (*Allium cepa* L.) cultivated under controlled deficit irrigation conditions in a semi-arid climate, 68 (2004) 77

Controlled drainage

The effects of a weir on reducing acid flux from a drained coastal acid sulphate soil backswamp, 69 (2004) 43

Controlled irrigation and fertilization

Irrigation and fertilizer effects on water use and yield of spring wheat in semi-arid regions, 67 (2004) 35

Conveyance losses

Seepage losses as affected by condition and composition of channel banks, 65 (2004) 145

Copper

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Corn

Comparison of corn yield response to plant water stress caused by salinity and by drought, 65 (2004) 95

Cotton

Review of measured crop water productivity values for irrigated wheat, rice, cotton and maize, 69 (2004) 115

Crisp risk

A fuzzy risk approach for performance evaluation of an irrigation reservoir system, 69 (2004) 159

Crop coefficient

Evapotranspiration and crop coefficients of irrigated garlic (*Allium sativum* L.) in a semi-arid climate, 64 (2004) 233

Evapotranspiration of flood-irrigated pecans, 69 (2004) 179

Crop coefficient and sensitivity analysis

Agricultural water management in a humid region: sensitivity to climate, soil and crop parameters, (70) (2004) 51

Crop diversification

Alternative cropping strategies for assured and efficient crop production in upland rainfed rice areas of eastern India based on rainfall analysis, 67 (2004) 47

Crop irrigation requirement

Effect of irrigation on fruit production in blueberry, 67 (2004) 173

Crop model

Estimating irrigation demand for water management on a regional scale. I. ADEAUMIS, a simulation platform based on bio-decisional modelling and spatial information, 68 (2004) 207

Estimating irrigation demand for water management on a regional scale. II. Validation of ADEAUMIS, 68 (2004) 233

Crop water productivity

Review of measured crop water productivity values for irrigated wheat, rice, cotton and maize, 69 (2004) 115

Crop water requirements

A GIS-based model to estimate the regionally distributed drought water demand, 66 (2004) 1
Resource-centred thinking in river basins: should we revoke the crop water requirement approach to irrigation planning?, 68 (2004) 33

Crop water use

Sugarcane water use from shallow water tables: implications for improving irrigation water use efficiency, 65 (2004) 1

Crop water-use modeling

Comparing Penman-Monteith and Priestley-Taylor approaches as reference-evapotranspiration inputs for modeling maize water-use under Mediterranean conditions, 66 (2004) 205

Crop yield

A comparison between low-cost drip irrigation, conventional drip irrigation, and hand watering in Nepal, 64 (2004) 143

Cropping pattern

Measuring the willingness of farmers to pay for groundwater in the highland areas of Jordan, 68 (2004) 61

CWSI

Evaluation of a crop water stress index for detecting water stress in winter wheat in the North China Plain, 64 (2004) 29

Cynodon dactylon

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Daily operating factor

Optimizing operational strategies of scavenger wells in lower Indus Basin of Pakistan, 66 (2004) 239

Decision model

Estimating irrigation demand for water management on a regional scale. I. ADEAUMIS, a simulation platform based on bio-decisional modelling and spatial information, 68 (2004) 207

Estimating irrigation demand for water management on a regional scale. II. Validation of ADEAUMIS, 68 (2004) 233

Deep drainage

Water balance of Swamp Mahogany and Rhodes grass irrigated with treated sewage effluent, 67 (2004) 157

Deficit irrigation

The role of supplemental irrigation and nitrogen in producing bread wheat in the highlands of Iran, 65 (2004) 225

Water use efficiency of winter-sown chickpea under supplemental irrigation in a mediterranean environment, 66 (2004) 163

Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

Depletion level

Effective management of irrigation water for maize under stressed conditions, 66 (2004) 181

DI

Yield response of greenhouse grown tomato to partial root drying and conventional deficit irrigation, 69 (2004) 191

Dielectric coating

Dielectric coated water content reflectometer for improved monitoring of near surface soil moisture in heavily fertilized paddy field, 64 (2004) 161

Diffuse pollution

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 211

Diffusive tank model

Diffusive tank model application in rainfall-runoff analysis of upland fields in Taiwan, (70) (2004) 39

Diffusivity

Unsaturated flow of different quality irrigation waters through clay, clay loam and silt loam soils and its dependence on soil and solution parameters, 64 (2004) 69

Discharge coefficients

Mathematical modeling of open-channel velocity profiles for float method calibration, (70) (2004) 229

Discharge measurement

Mathematical modeling of open-channel velocity profiles for float method calibration, (70) (2004) 229

Disjunctive kriging

Mapping of salinity risk in the lower Namoi valley using non-linear kriging methods, 69 (2004) 203

Drain discharge

Field research on the performance of various drainage materials in Lithuania, 68 (2004) 151

Drainage

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 195

Drainage ditch

Spatial and temporal variations of water quality in drainage ditches within vegetable farms and citrus groves, 65 (2004) 39

Drainage materials

Field research on the performance of various drainage materials in Lithuania, 68 (2004) 151

Drainage performance

Field research on the performance of various drainage materials in Lithuania, 68 (2004) 151

Drainage water reuse

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Drip irrigation

Impact of drip and surface irrigation on growth, yield and WUE of capsicum (*Capsicum annum* L.), 65 (2004) 121

Economics of drip irrigation of olives in Turkey, 66 (2004) 145

Wetting patterns and nitrogen distributions as affected by fertigation strategies from a surface point source, 67 (2004) 89

Effect of subsurface drip irrigation on processing tomato yield, water table depth, soil salinity, and profitability, 68 (2004) 1

Emitter and filter tests for wastewater reuse by drip irrigation, 68 (2004) 135

Drip irrigation

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97

Drip-irrigation

Effects of water stress at specific growth stages on onion bulb yield and quality, 68 (2004) 107

Drought

Comparison of corn yield response to plant water stress caused by salinity and by drought, 65 (2004) 95

Alternative cropping strategies for assured and efficient crop production in upland rainfed rice areas of eastern India based on rainfall analysis, 67 (2004) 47

Drought stress

Deficiency of water can enhance root respiration rate of drought-sensitive but not drought-tolerant spring wheat, 64 (2004) 41

Dry-period irrigation

Dry-period irrigation and fertilizer application affect water use and yield of spring wheat in semi-arid regions, 65 (2004) 133

Economic efficiency

Evaluation of the water cost effect on water resource management: Application to typical crops in a semiarid region, 66 (2004) 125

Economic impacts

Modelling the regional and farm-level economic impacts of environmental flows for regulated rivers in NSW, Australia, 66 (2004) 77

Economic optimisation

Evaluation of the water cost effect on water resource management: Application to typical crops in a semiarid region, 66 (2004) 125

Economic returns (productivity)

Examining traditional irrigation methods, irrigation scheduling and alternate furrows irrigation on vertisols in northern Ethiopia, 64 (2004) 17

Economics

The policy relevance of virtual water can be enhanced by considering comparative advantages, 66 (2004) 49

Economics of drip irrigation of olives in Turkey, 66 (2004) 145

Eddy covariance

Evapotranspiration and crop coefficients of irrigated garlic (*Allium sativum* L.) in a semi-arid climate, 64 (2004) 233

Electrolyte concentration

Unsaturated flow of different quality irrigation waters through clay, clay loam and silt loam soils and its dependence on soil and solution parameters, 64 (2004) 69

Emitters

Emitter and filter tests for wastewater reuse by drip irrigation, 68 (2004) 135

Empirical method

Adaptation of the Thornthwaite scheme for estimating daily reference evapotranspiration, 66 (2004) 251

Enclosed portable chamber

Evaluation of an enclosed portable chamber to measure crop and pasture actual evapotranspiration at small scale, 67 (2004) 15

Environmental change

Entrenched views or insufficient science?. Contested causes and solutions of water allocation; insights from the Great Ruaha River Basin, Tanzania, 69 (2004) 135

Environmental flows

Modelling the regional and farm-level economic impacts of environmental flows for regulated rivers in NSW, Australia, 66 (2004) 77

Environmental issues

Optimizing operational strategies of scavenger wells in lower Indus Basin of Pakistan, 66 (2004) 239

Eroded sediments

Sediment flow behaviour from small agricultural watersheds, 67 (2004) 105

Estuary

The effects of a weir on reducing acid flux from a drained coastal acid sulphate soil backswamp, 69 (2004) 43

ET₀ forecasts

Assessment of evapotranspiration estimation models for use in semi-arid environments, 64 (2004) 91

Eutrophication

Phosphorus transfer from soil to surface waters, 68 (2004) 91

Evaluation of pedotransfer functions

Evaluation of pedotransfer functions in predicting the soil water contents at field capacity and wilting point, (70) (2004) 83

Evaporation

Effects of gravel mulch on water vapor transfer above and below the soil surface, 67 (2004) 145

Evapotranspiration

Vulnerability of groundwater resources from agricultural activities in southern Kuwait, 64 (2004) 1

Scheduling water application on drip irrigated sugarcane, 64 (2004) 169

A computer model for design of microcatchment water harvesting systems for rain-fed vineyard, 64 (2004) 213

Evapotranspiration and crop coefficients of irrigated garlic (*Allium sativum* L.) in a semi-arid climate, 64 (2004) 233

A wind-based qualitative calibration of the Hargreaves ET₀ estimation equation in semiarid regions, 64 (2004) 251

Sugarcane water use from shallow water tables: implications for improving irrigation water use efficiency, 65 (2004) 1

Evaluation of an enclosed portable chamber to measure crop and pasture actual evapotranspiration at small scale, 67 (2004) 15

Interactive effects of elevated CO₂, nitrogen and drought on leaf area, stomatal conductance, and evapotranspiration of wheat, 67 (2004) 221

Simulation of water dynamics and irrigation scheduling for winter wheat and maize in seasonal frost areas, 68 (2004) 117

Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

Sensitivity of evapotranspiration to global warming: a case study of arid zone of Rajasthan (India), 69 (2004) 1

Relationships among the leaf area index, moisture availability, and spectral reflectance in an upland rice field, 69 (2004) 83

Soil water balance simulation of alfalfa (*Medicago sativa* L.) in the semiarid Chinese Loess Plateau, 69 (2004) 101

Evapotranspiration of flood-irrigated pecans, 69 (2004) 179

Evapotranspiration (ET)

Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107

Evapotranspiration (ETo)

Assessment of evapotranspiration estimation models for use in semi-arid environments, 64 (2004) 91

Every furrow-scientific scheduling

Examining traditional irrigation methods, irrigation scheduling and alternate furrows irrigation on vertisols in northern Ethiopia, 64 (2004) 17

Farm dams

Temporal variations in water quality of farm dams: impacts of land use and water sources, (70) (2004) 151

Farmyard manure

Rice root growth and nutrient uptake as influenced by organic manure in continuously and alternately flooded paddy soils, (70) (2004) 67

Fecal coliforms

Assessing microbial pollution of rural surface waters. A review of current watershed scale modeling approaches, (70) (2004) 1

Ferghana Valley

Using remote sensing data for water depletion assessment at administrative and irrigation-system levels: case study of the Ferghana Province of Uzbekistan, 64 (2004) 183

Fertigation

Wetting patterns and nitrogen distributions as affected by fertigation strategies from a surface point source, 67 (2004) 89

Fertigation strategies

Wetting patterns and nitrogen distributions as affected by fertigation strategies from a surface point source, 67 (2004) 89

Fertilization

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 211

Fertilizer application

Dry-period irrigation and fertilizer application affect water use and yield of spring wheat in semi-arid regions, 65 (2004) 133

Field capacity

Evaluation of pedotransfer functions in predicting the soil water contents at field capacity and wilting point, (70) (2004) 83

Filers

Emitter and filter tests for wastewater reuse by drip irrigation, 68 (2004) 135

Filter technique

Water balance of Swamp Mahogany and Rhodes grass irrigated with treated sewage effluent, 67 (2004) 157

Fixed plate

Characterizing pivot sprinklers using an experimental irrigation machine, (70) (2004) 177

Float method

Mathematical modeling of open-channel velocity profiles for float method calibration, (70) (2004) 229

Floatplain

The effects of a weir on reducing acid flux from a drained coastal acid sulphate soil backswamp, 69 (2004) 43

Food security

Adaptation to climate change to enhance food security and preserve environmental quality: example for southern Sri Lanka, 66 (2004) 15

Free surface evaporation

Irrigation frequency and amount affect yield components of summer squash (*Cucurbita pepo* L.), 67 (2004) 63

Fruit maturity advancement

Partial rootzone drying is a feasible option for irrigating processing tomatoes, 68 (2004) 195

Fruit quality

Partial rootzone drying is a feasible option for irrigating processing tomatoes, 68 (2004) 195

Furrow

Infiltration parameters for furrow irrigation, 68 (2004) 19

Fuzzy event

A fuzzy risk approach for performance evaluation of an irrigation reservoir system, 69 (2004) 159

Fuzzy risk

A fuzzy risk approach for performance evaluation of an irrigation reservoir system, 69 (2004) 159

Garlic

Evapotranspiration and crop coefficients of irrigated garlic (*Allium sativum* L.) in a semi-arid climate, 64 (2004) 233

Gediz Basin

Performance of water delivery system at tertiary canal level: a case study of the Menemen Left Bank Irrigation System, Gediz Basin, Turkey, 65 (2004) 155

Georgia

Agricultural water use estimation using geospatial modeling and a geographic information system, 67 (2004) 185

Geostatistics

Agricultural water use estimation using geospatial modeling and a geographic information system, 67 (2004) 185

GIS

A GIS-based model to estimate the regionally distributed drought water demand, 66 (2004) 1

Global warming

Sensitivity of evapotranspiration to global warming: a case study of arid zone of Rajasthan (India), 69 (2004) 1

Grain yield

Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107

Dry-period irrigation and fertilizer application affect water use and yield of spring wheat in semi-arid regions, 65 (2004) 133

Effect of the niche-fitness at different water supply and fertilization on yield of spring wheat in farmland of semi-arid areas, 67 (2004) 1

Irrigation and fertilizer effects on water use and yield of spring wheat in semi-arid regions, 67 (2004) 35

Effects of irrigation before sowing and plastic film mulching on yield and water uptake of spring wheat in semiarid Loess Plateau of China, 67 (2004) 77

Grapevines

Influence of rootstock, irrigation level and recycled water on growth and yield of Soultanina grapevines, 69 (2004) 13

Grass strip

Effect of soil and water conservation and nutrient management on the soil-plant water balance in semi-arid Burkina Faso, 65 (2004) 103

Gravel mulch

Effects of gravel mulch on water vapor transfer above and below the soil surface, 67 (2004) 145

Gravel-sand mulch

The effect of supplemental irrigation on watermelon (*Citrullus lanatus*) production in gravel and sand mulched fields in the Loess Plateau of northwest China, 69 (2004) 29

Groundwater

Sugarcane water use from shallow water tables: implications for improving irrigation water use efficiency, 65 (2004) 1

Measuring the willingness of farmers to pay for groundwater in the highland areas of Jordan, 68 (2004) 61

Growth

Influence of rootstock, irrigation level and recycled water on growth and yield of Soultanina grapevines, 69 (2004) 13

Hand watering

- A comparison between low-cost drip irrigation, conventional drip irrigation, and hand watering in Nepal, 64 (2004) 143

Hargreaves

- A wind-based qualitative calibration of the Hargreaves ET_0 estimation equation in semiarid regions, 64 (2004) 251

Hargreaves equation

- Changes in seasonal evapotranspiration, soil water content, and crop coefficients in sugarcane, cassava, and maize fields in Northeast Thailand, 67 (2004) 133

Heavy metals

- Spatial and temporal variations of water quality in drainage ditches within vegetable farms and citrus groves, 65 (2004) 39

Hydraulic conductivity

- Water balance of Swamp Mahogany and Rhodes grass irrigated with treated sewage effluent, 67 (2004) 157

Hydrograph separation

- Water balance and irrigation performance analysis: La Violada irrigation district (Spain) as a case study, 64 (2004) 123

Hydrological basin

- Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 195

In situ moisture conservation practices

- Effect of cultural practices on soil properties, moisture conservation and grain yield of winter sorghum (*Sorghum bicolor* L. Moench) in semi-arid tropics of India, 64 (2004) 49

Indicator kriging

- Mapping of salinity risk in the lower Namoi valley using non-linear kriging methods, 69 (2004) 203

Infiltration

- Infiltration parameters for furrow irrigation, 68 (2004) 19

Inflow-outflow method

- Comparative evaluation of canal seepage investigation techniques, 66 (2004) 65

Institutions

- Entrenched views or insufficient science?. Contested causes and solutions of water allocation; insights from the Great Ruaha River Basin, Tanzania, 69 (2004) 135

Integrated farming

- Integrated farming approach for runoff recycling systems in humid plateau areas of eastern India, 64 (2004) 197

Integrated water management

- Water resources management in Crete (Greece) including water recycling and reuse and proposed quality criteria, 66 (2004) 35

Interface decision support

- Validation of an agricultural non-point source model in a watershed in southern Ontario, 65 (2004) 59

Investment decisions

- Economics of drip irrigation of olives in Turkey, 66 (2004) 145

Irrigation

- Vulnerability of groundwater resources from agricultural activities in southern Kuwait, 64 (2004) 1
- Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107
- A comparison between low-cost drip irrigation, conventional drip irrigation, and hand watering in Nepal, 64 (2004) 143
- Seepage losses as affected by condition and composition of channel banks, 65 (2004) 145
- A GIS-based model to estimate the regionally distributed drought water demand, 66 (2004) 1
- Simulating the composition of the in situ soil solution by the model EXPRESO: application to a reclaimed marsh soil of SW Spain irrigated with saline water, 66 (2004) 113
- Evaluation of the water cost effect on water resource management: Application to typical crops in a semiarid region, 66 (2004) 125
- Effective management of irrigation water for maize under stressed conditions, 66 (2004) 181
- Comparative analysis of performance criteria in irrigation schemes: a case study of Gediz river basin in Turkey, 66 (2004) 259

Irrigation frequency and amount affect yield components of summer squash (*Cucurbita pepo* L.), 67 (2004) 63

Effects of irrigation before sowing and plastic film mulching on yield and water uptake of spring wheat in semiarid Loess Plateau of China, 67 (2004) 77

Agricultural water use estimation using geospatial modeling and a geographic information system, 67 (2004) 185

Infiltration parameters for furrow irrigation, 68 (2004) 19

Estimating irrigation demand for water management on a regional scale. I. ADEAUMIS, a simulation platform based on bio-decisional modelling and spatial information, 68 (2004) 207

Estimating irrigation demand for water management on a regional scale. II. Validation of ADEAUMIS, 68 (2004) 233

Influence of rootstock, irrigation level and recycled water on growth and yield of Soultanina grapevines, 69 (2004) 13

Agricultural water management in a humid region: sensitivity to climate, soil and crop parameters, (70) (2004) 51

Entrenched views or insufficient science?. Contested causes and solutions of water allocation: insights from the Great Ruaha River Basin, Tanzania, 69 (2004) 135

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 211

Irrigation consumptive use coefficient (ICUC)

Water balance and irrigation performance analysis: La Violada irrigation district (Spain) as a case study, 64 (2004) 123

Irrigation efficiency

Evapotranspiration of flood-irrigated pecans, 69 (2004) 179

Irrigation efficiency

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 195

Irrigation performance

Water balance and irrigation performance analysis: La Violada irrigation district (Spain) as a case study, 64 (2004) 123

Irrigation scheduling

Simulations on direct and cyclic use of saline waters for sustaining cotton-wheat in a semi-arid area of north-west India, 66 (2004) 153

Development and testing of a GIS integrated irrigation scheduling model, 66 (2004) 221

Irrigation frequency and amount affect yield components of summer squash (*Cucurbita pepo* L.), 67 (2004) 63

Simulation of water dynamics and irrigation scheduling for winter wheat and maize in seasonal frost areas, 68 (2004) 117

Analysis of irrigation systems and irrigation strategies for durum wheat in Tunisia, (70) (2004) 19

Irrigation systems

Using remote sensing data for water depletion assessment at administrative and irrigation-system levels: case study of the Ferghana Province of Uzbekistan, 64 (2004) 183

Irrigation systems

Analysis of irrigation systems and irrigation strategies for durum wheat in Tunisia, (70) (2004) 19

Irrigation use efficiency

Partial rootzone drying is a feasible option for irrigating processing tomatoes, 68 (2004) 195

Irrigation water delivery

Performance of water delivery system at tertiary canal level: a case study of the Menemen Left Bank Irrigation System, Gediz Basin, Turkey, 65 (2004) 155

Kinematic-wave model

Infiltration parameters for furrow irrigation, 68 (2004) 19

Kostiakov

Infiltration parameters for furrow irrigation, 68 (2004) 19

L. ulginosus

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Land and water management

Sediment flow behaviour from small agricultural watersheds, 67 (2004) 105

Land reclamation

Performance of subsurface drains for reclaiming waterlogged saline lands under rolling topography in Tungabhadra irrigation project in India, 69 (2004) 69

Land use

Temporal variations in water quality of farm dams: impacts of land use and water sources, (70) (2004) 151

Leaf area

Interactive effects of elevated CO₂, nitrogen and drought on leaf area, stomatal conductance, and evapotranspiration of wheat, 67 (2004) 221

Leaf area index

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97

Legumes

Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

Lentil

Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

Livelihoods

Resource-centred thinking in river basins; should we revoke the crop water requirement approach to irrigation planning?, 68 (2004) 33

Loess Plateau

Effects of irrigation before sowing and plastic film mulching on yield and water uptake of spring wheat in semiarid Loess Plateau of China, 67 (2004) 77

Lotus glaber

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Low crop yield

A fuzzy risk approach for performance evaluation of an irrigation reservoir system, 69 (2004) 159

Low leaf area index

Estimation of evapotranspiration, transpiration ratio and water-use efficiency from a sparse canopy using a compartment model, 65 (2004) 173

Low-cost drip irrigation

A comparison between low-cost drip irrigation, conventional drip irrigation, and hand watering in Nepal, 64 (2004) 143

Lower Indus Basin

Optimizing operational strategies of scavenger wells in lower Indus Basin of Pakistan, 66 (2004) 239

Lowland rice

Effect of water-saving irrigation on rice yield and water use in typical lowland conditions in Asia, 65 (2004) 193

Lowland rice (*Orzya sativa* L.)

Rice root growth and nutrient uptake as influenced by organic manure in continuously and alternately flooded paddy soils, (70) (2004) 67

Lycopersicon esculentum

Partial rootzone drying is a feasible option for irrigating processing tomatoes, 68 (2004) 195

Yield response of greenhouse grown tomato to partial root drying and conventional deficit irrigation, 69 (2004) 191

Magnesium

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 121

Maize

Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107

Potential nitrate losses under different agricultural practices in the pampas region, Argentina, 65 (2004) 83

Review of measured crop water productivity values for irrigated wheat, rice, cotton and maize, 69 (2004) 115

Maize irrigation

Comparing Penman–Monteith and Priestley–Taylor approaches as reference-evapotranspiration inputs for modeling maize water-use under Mediterranean conditions, 66 (2004) 205

Management

Comparative analysis of performance criteria in irrigation schemes: a case study of Gediz river basin in Turkey, 66 (2004) 259

Mass balance

Characteristics and behavior of nutrients in a paddy field area equipped with a recycling irrigation system, 68 (2004) 47

Mat rush

Dielectric coated water content reflectometer for improved monitoring of near surface soil moisture in heavily fertilized paddy field, 64 (2004) 161

Measuring techniques

Comparative evaluation of canal seepage investigation techniques, 66 (2004) 65

Medicago sativa

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Mediterranean conditions

Comparing Penman–Monteith and Priestley–Taylor approaches as reference-evapotranspiration inputs for modeling maize water-use under Mediterranean conditions, 66 (2004) 205

Microbial

Assessing microbial pollution of rural surface waters. A review of current watershed scale modeling approaches, (70) (2004) 1

Microcatchment area

A computer model for design of microcatchment water harvesting systems for rain-fed vineyard, 64 (2004) 213

Microcatchment water harvesting system

A computer model for design of microcatchment water harvesting systems for rain-fed vineyard, 64 (2004) 213

Microirrigation

Assessment of evapotranspiration estimation models for use in semi-arid environments, 64 (2004) 91
Effect of irrigation on fruit production in blueberry, 67 (2004) 173

Mineral nutrition

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Modeling

Adaptation to climate change to enhance food security and preserve environmental quality: example for southern Sri Lanka, 66 (2004) 15
Modelling the regional and farm-level economic impacts of environmental flows for regulated rivers in NSW, Australia, 66 (2004) 77
Development and testing of a GIS integrated irrigation scheduling model, 66 (2004) 221
Irrigation scheduling of confectionery groundnut (*Arachis hypogaea* L.) in Senegal using a simple water balance model, 67 (2004) 201
Assessing microbial pollution of rural surface waters. A review of current watershed scale modeling approaches, (70) (2004) 1
Diffusive tank model application in rainfall-runoff analysis of upland fields in Taiwan, (70) (2004) 39

Modelling diffusion

Phosphorus transfer from soil to surface waters, 68 (2004) 91

Molybdenum

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Multiple indicator kriging

Mapping of salinity risk in the lower Namoi valley using non-linear kriging methods, 69 (2004) 203

Multiple-center bulb

Effects of water stress at specific growth stages on onion bulb yield and quality, 68 (2004) 107

Natural grasses

Mechanical control of shrubs in a semiarid region of Argentina and its effect on soil water content and grassland productivity, 68 (2004) 185

Navier-Stokes equations

Mathematical modeling of open-channel velocity profiles for float method calibration, (70) (2004) 229

Nepal

A comparison between low-cost drip irrigation, conventional drip irrigation, and hand watering in Nepal, 64 (2004) 143

Net assimilation rate

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97

Niche-fitness

Effect of the niche-fitness at different water supply and fertilization on yield of spring wheat in farmland of semi-arid areas, 67 (2004) 1

Nitrate

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 211

Nitrate leaching

Potential nitrate losses under different agricultural practices in the pampas region, Argentina, 65 (2004) 83

Nitrogen

Effect of cultural practices on soil properties, moisture conservation and grain yield of winter sorghum (*Sorghum bicolor* L. Moench) in semi-arid tropics of India, 64 (2004) 49

Effect of water-saving irrigation on rice yield and water use in typical lowland conditions in Asia, 65 (2004) 193

The role of supplemental irrigation and nitrogen in producing bread wheat in the highlands of Iran, 65 (2004) 225

Wetting patterns and nitrogen distributions as affected by fertigation strategies from a surface point source, 67 (2004) 89

Characteristics and behavior of nutrients in a paddy field area equipped with a recycling irrigation system, 68 (2004) 47

Nitrogen fertilization

Potential nitrate losses under different agricultural practices in the pampas region, Argentina, 65 (2004) 83

Nitrogen nutrition

Interactive effects of elevated CO₂, nitrogen and drought on leaf area, stomatal conductance, and evapotranspiration of wheat, 67 (2004) 221

Non-point source modeling

Validation of an agricultural non-point source model in a watershed in southern Ontario, 65 (2004) 59

Nonsubmergence

Effect of water-saving irrigation on rice yield and water use in typical lowland conditions in Asia, 65 (2004) 193

Nopalitos

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97

North China Plain

Evaluation of a crop water stress index for detecting water stress in winter wheat in the North China Plain, 64 (2004) 29

Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107

Numerical modeling

Vulnerability of groundwater resources from agricultural activities in southern Kuwait, 64 (2004) 1

Numerical simulation

Simulation of water dynamics and irrigation scheduling for winter wheat and maize in seasonal frost areas, 68 (2004) 117

Nutrient input

Effect of soil and water conservation and nutrient management on the soil-plant water balance in semi-arid Burkina Faso, 65 (2004) 103

Nutrient uptake

Rice root growth and nutrient uptake as influenced by organic manure in continuously and alternately flooded paddy soils, (70) (2004) 67

Nutrients

Spatial and temporal variations of water quality in drainage ditches within vegetable farms and citrus groves, 65 (2004) 39

Influence of rootstock, irrigation level and recycled water on growth and yield of Soultanina grapevines, 69 (2004) 13

Olive

Economics of drip irrigation of olives in Turkey, 66 (2004) 145

Onion

Production and quality of the onion crop (*Allium cepa* L.) cultivated under controlled deficit irrigation conditions in a semi-arid climate, 68 (2004) 77

Open canal system

Performance of water delivery system at tertiary canal level: a case study of the Menemen Left Bank Irrigation System, Gediz Basin, Turkey, 65 (2004) 155

Open-channel flow

Mathematical modeling of open-channel velocity profiles for float method calibration, (70) (2004) 229

Open-channel velocity distribution

Mathematical modeling of open-channel velocity profiles for float method calibration, (70) (2004) 229

Opportunity costs

The policy relevance of virtual water can be enhanced by considering comparative advantages, 66 (2004) 49

Opuntia

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97

Ordinary kriging

Mapping of salinity risk in the lower Namoi valley using non-linear kriging methods, 69 (2004) 203

Organic sources

Effect of cultural practices on soil properties, moisture conservation and grain yield of winter sorghum (*Sorghum bicolor* L. Moench) in semi-arid tropics of India, 64 (2004) 49

Overspray

Water balance of Swamp Mahogany and Rhodes grass irrigated with treated sewage effluent, 67 (2004) 157

Paddy field

Dielectric coated water content reflectometer for improved monitoring of near surface soil moisture in heavily fertilized paddy field, 64 (2004) 161

Characteristics and behavior of nutrients in a paddy field area equipped with a recycling irrigation system, 68 (2004) 47

Pakistan

Optimizing operational strategies of scavenger wells in lower Indus Basin of Pakistan, 66 (2004) 239

Pampas

Potential nitrate losses under different agricultural practices in the pampas region, Argentina, 65 (2004) 83

Pan evaporation

Scheduling water application on drip irrigated sugarcane, 64 (2004) 169

Participatory

Comparative analysis of performance criteria in irrigation schemes: a case study of Gediz river basin in Turkey, 66 (2004) 259

Paspalum vaginatum

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Pasture

Evaluation of an enclosed portable chamber to measure crop and pasture actual evapotranspiration at small scale, 67 (2004) 15

Pecan

Evapotranspiration of flood-irrigated pecans, 69 (2004) 179

Penman-Monteith

Adaptation of the Thornthwaite scheme for estimating daily reference evapotranspiration, 66 (2004) 251

Penman-Monteith equation

Changes in seasonal evapotranspiration, soil water content, and crop coefficients in sugarcane, cassava, and maize fields in Northeast Thailand, 67 (2004) 133

Soil water balance simulation of alfalfa (*Medicago sativa* L.) in the semiarid Chinese Loess Plateau, 69 (2004) 101

Pennisetum clandestinum

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Percolation index

Simulations on direct and cyclic use of saline waters for sustaining cotton-wheat in a semi-arid area of north-west India, 66 (2004) 153

Performance criteria

Comparative analysis of performance criteria in irrigation schemes: a case study of Gediz river basin in Turkey, 66 (2004) 259

Phosphate release from soil

Phosphorus transfer from soil to surface waters, 68 (2004) 91

Phosphorus

Characteristics and behavior of nutrients in a paddy field area equipped with a recycling irrigation system, 68 (2004) 47

Physiology

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97

Planning

Resource-centred thinking in river basins; should we revoke the crop water requirement approach to irrigation planning?, 68 (2004) 33

Plastic film mulch

Effects of irrigation before sowing and plastic film mulching on yield and water uptake of spring wheat in semiarid Loess Plateau of China, 67 (2004) 77

Policy

Entrenched views or insufficient science?. Contested causes and solutions of water allocation; insights from the Great Ruaha River Basin, Tanzania, 69 (2004) 135

Ponding

Comparative evaluation of canal seepage investigation techniques, 66 (2004) 65

Potassium

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 121

Potential evaporation

Relationships among the leaf area index, moisture availability, and spectral reflectance in an upland rice field, 69 (2004) 83

PRD

Yield response of greenhouse grown tomato to partial root drying and conventional deficit irrigation, 69 (2004) 191

Precipitation

Characterizing pivot sprinklers using an experimental irrigation machine, (70) (2004) 177

Price elasticity

Measuring the willingness of farmers to pay for groundwater in the highland areas of Jordan, 68 (2004) 61

Processing tomato

Effect of subsurface drip irrigation on processing tomato yield, water table depth, soil salinity, and profitability, 68 (2004) 1

Productivity

Productivity enhancement through rice-fish farming using a two-stage rainwater conservation technique, 67 (2004) 119

2-Propenol

Irrigation of pepper plant (*Capsicum* sp.) with water containing acrolein, 67 (2004) 235

Quality criteria

Water resources management in Crete (Greece) including water recycling and reuse and proposed quality criteria, 66 (2004) 35

Rainfall-runoff simulation

Diffusive tank model application in rainfall-runoff analysis of upland fields in Taiwan, (70) (2004) 39

Rainfed agriculture

Water use efficiency of winter-sown chickpea under supplemental irrigation in a mediterranean environment, 66 (2004) 163

Rainfed rice lands

Productivity enhancement through rice-fish farming using a two-stage rainwater conservation technique, 67 (2004) 119

Rain-fed vineyard

A computer model for design of microcatchment water harvesting systems for rain-fed vineyard, 64 (2004) 213

Rainfed wheat

The role of supplemental irrigation and nitrogen in producing bread wheat in the highlands of Iran, 65 (2004) 225

Rainwater harvesting

Runoff characteristics of artificial catchment materials for rainwater harvesting in the semiarid regions of China, 65 (2004) 211

Rainwater use efficiency

Alternative cropping strategies for assured and efficient crop production in upland rainfed rice areas of eastern India based on rainfall analysis, 67 (2004) 47

Reclaimed wastewater

Emitter and filter tests for wastewater reuse by drip irrigation, 68 (2004) 135

Recovery ratio

Optimizing operational strategies of scavenger wells in lower Indus Basin of Pakistan, 66 (2004) 239

Recycling irrigation system

Characteristics and behavior of nutrients in a paddy field area equipped with a recycling irrigation system, 68 (2004) 47

Reference ET

Adaptation of the Thornthwaite scheme for estimating daily reference evapotranspiration, 66 (2004) 251

Reference-evapotranspiration calculation

Comparing Penman–Monteith and Priestley–Taylor approaches as reference-evapotranspiration inputs for modeling maize water-use under Mediterranean conditions, 66 (2004) 205

Regional scale

Estimating irrigation demand for water management on a regional scale. I. ADEAUMIS, a simulation platform based on bio-decisional modelling and spatial information, 68 (2004) 207

Estimating irrigation demand for water management on a regional scale. II. Validation of ADEAUMIS, 68 (2004) 233

Relative evapotranspiration

Simulations on direct and cyclic use of saline waters for sustaining cotton–wheat in a semi-arid area of north-west India, 66 (2004) 153

Remote sensing

Using remote sensing data for water depletion assessment at administrative and irrigation-system levels: case study of the Ferghana Province of Uzbekistan, 64 (2004) 183

Reuse

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Rice

Review of measured crop water productivity values for irrigated wheat, rice, cotton and maize, 69 (2004) 115

Rice yields

Performance of subsurface drains for reclaiming waterlogged saline lands under rolling topography in Tungabhadra irrigation project in India, 69 (2004) 69

Rice–fish farming

Productivity enhancement through rice–fish farming using a two-stage rainwater conservation technique, 67 (2004) 119

River basin management

Resource-centred thinking in river basins; should we revoke the crop water requirement approach to irrigation planning?, 68 (2004) 33

Entrenched views or insufficient science?. Contested causes and solutions of water allocation; insights from the Great Ruaha River Basin, Tanzania, 69 (2004) 135

Rolling

Mechanical control of shrubs in a semiarid region of Argentina and its effect on soil water content and grassland productivity, 68 (2004) 185

Root morphology

Impact of drip and surface irrigation on growth, yield and WUE of capsicum (*Capsicum annum* L.), 65 (2004) 121

Root morphology and activity

Rice root growth and nutrient uptake as influenced by organic manure in continuously and alternately flooded paddy soils, (70) (2004) 67

Root respiration

Deficiency of water can enhance root respiration rate of drought-sensitive but not drought-tolerant spring wheat, 64 (2004) 41

Root:shoot ratio

Deficiency of water can enhance root respiration rate of drought-sensitive but not drought-tolerant spring wheat, 64 (2004) 41

Rosetta software

Evaluation of pedotransfer functions in predicting the soil water contents at field capacity and wilting point, (70) (2004) 83

Rotating plate

Characterizing pivot sprinklers using an experimental irrigation machine, (70) (2004) 177

Runoff

Runoff characteristics of artificial catchment materials for rainwater harvesting in the semiarid regions of China, 65 (2004) 211

Phosphorus transfer from soil to surface waters, 68 (2004) 91

Runoff recycling

Integrated farming approach for runoff recycling systems in humid plateau areas of eastern India, 64 (2004) 197

Rural

Assessing microbial pollution of rural surface waters. A review of current watershed scale modeling approaches, (70) (2004) 1

Saline water

Simulating the composition of the in situ soil solution by the model EXPRESO: application to a reclaimed marsh soil of SW Spain irrigated with saline water, 66 (2004) 113

Salinity

Comparison of corn yield response to plant water stress caused by salinity and by drought, 65 (2004) 95

Effect of subsurface drip irrigation on processing tomato yield, water table depth, soil salinity, and profitability, 68 (2004) 1

Influence of rootstock, irrigation level and recycled water on growth and yield of Soultanina grapevines, 69 (2004) 13

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 211

Salinity assessment

Mapping of salinity risk in the lower Namoi valley using non-linear kriging methods, 69 (2004) 203

Salinity hazard index

Simulations on direct and cyclic use of saline waters for sustaining cotton-wheat in a semi-arid area of north-west India, 66 (2004) 153

Salt and water balance modelling

Mapping of salinity risk in the lower Namoi valley using non-linear kriging methods, 69 (2004) 203

Salt glands

Growth response of four turfgrass species to salinity, 66 (2004) 97

Salt leaching

Performance of subsurface drains for reclaiming waterlogged saline lands under rolling topography in Tungabhadra irrigation project in India, 69 (2004) 69

Salt tolerance

Growth response of four turfgrass species to salinity, 66 (2004) 97

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

SAR

Unsaturated flow of different quality irrigation waters through clay, clay loam and silt loam soils and its dependence on soil and solution parameters, 64 (2004) 69

Scavenger wells

Optimizing operational strategies of scavenger wells in lower Indus Basin of Pakistan, 66 (2004) 239

Scheduling irrigation

Irrigation scheduling of confectionery groundnut (*Arachis hypogaea* L.) in Senegal using a simple water balance model, 67 (2004) 201

Science

Entrenched views or insufficient science?. Contested causes and solutions of water allocation; insights from the Great Ruaha River Basin, Tanzania, 69 (2004) 135

Seasonal frost areas

Simulation of water dynamics and irrigation scheduling for winter wheat and maize in seasonal frost areas, 68 (2004) 117

SEBAL

Using remote sensing data for water depletion assessment at administrative and irrigation-system levels: case study of the Ferghana Province of Uzbekistan, 64 (2004) 183

Sediment flow

Sediment flow behaviour from small agricultural watersheds, 67 (2004) 105

Seepage losses

Comparative evaluation of canal seepage investigation techniques, 66 (2004) 65

Selenium

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Semi-arid

Runoff characteristics of artificial catchment materials for rainwater harvesting in the semi-arid regions of China, 65 (2004) 211

Semi-arid areas

Effect of the niche-fitness at different water supply and fertilization on yield of spring wheat in farmland of semi-arid areas, 67 (2004) 1

Semi-arid climate

A wind-based qualitative calibration of the Hargreaves ET_0 estimation equation in semi-arid regions, 64 (2004) 251

Semi-arid farmland

Dry-period irrigation and fertilizer application affect water use and yield of spring wheat in semi-arid regions, 65 (2004) 133

Semi-arid region

Irrigation and fertilizer effects on water use and yield of spring wheat in semi-arid regions, 67 (2004) 35

Mechanical control of shrubs in a semiarid region of Argentina and its effect on soil water content and grassland productivity, 68 (2004) 185

Semi-arid tropics

Sediment flow behaviour from small agricultural watersheds, 67 (2004) 105

Senegal

Irrigation scheduling of confectionery groundnut (*Arachis hypogaea* L.) in Senegal using a simple water balance model, 67 (2004) 201

Separate estimation

Estimation of evapotranspiration, transpiration ratio and water-use efficiency from a sparse canopy using a compartment model, 65 (2004) 173

Shallow groundwater

Effect of subsurface drip irrigation on processing tomato yield, water table depth, soil salinity, and profitability, 68 (2004) 1

Shoot/root growth

Growth response of four turfgrass species to salinity, 66 (2004) 97

Shrub control

Mechanical control of shrubs in a semiarid region of Argentina and its effect on soil water content and grassland productivity, 68 (2004) 185

Simulation model

Simulating the composition of the in situ soil solution by the model EXPRESO: application to a reclaimed marsh soil of SW Spain irrigated with saline water, 66 (2004) 113

Single-center bulb

Effects of water stress at specific growth stages on onion bulb yield and quality, 68 (2004) 107

Smallholder irrigation

Resource-centred thinking in river basins; should we revoke the crop water requirement approach to irrigation planning?, 68 (2004) 33

Sodium

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 121

Soil

Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 195

Soil moisture content

Water balance of Swamp Mahogany and Rhodes grass irrigated with treated sewage effluent, 67 (2004) 157

Soil nutrition

Effect of the niche-fitness at different water supply and fertilization on yield of spring wheat in farmland of semi-arid areas, 67 (2004) 1

Soil phosphorus tests

Phosphorus transfer from soil to surface waters, 68 (2004) 91

Soil salinity

Simulating the composition of the in situ soil solution by the model EXPRESO: application to a reclaimed marsh soil of SW Spain irrigated with saline water, 66 (2004) 113

Soil solution

Simulating the composition of the in situ soil solution by the model EXPRESO: application to a reclaimed marsh soil of SW Spain irrigated with saline water, 66 (2004) 113

Soil surface resistance

Estimation of evapotranspiration, transpiration ratio and water-use efficiency from a sparse canopy using a compartment model, 65 (2004) 173
Effects of gravel mulch on water vapor transfer above and below the soil surface, 67 (2004) 145

Soil volumetric water content

A comparison between low-cost drip irrigation, conventional drip irrigation, and hand watering in Nepal, 64 (2004) 143

Soil water

Wetting patterns and nitrogen distributions as affected by fertigation strategies from a surface point source, 67 (2004) 89

Soil water balance

A GIS-based model to estimate the regionally distributed drought water demand, 66 (2004) 1
Development and testing of a GIS integrated irrigation scheduling model, 66 (2004) 221

Soil water balance simulation of alfalfa (*Medicago sativa* L.) in the semiarid Chinese Loess Plateau, 69 (2004) 101

Soil water balance

Agricultural water management in a humid region: sensitivity to climate, soil and crop parameters, (70) (2004) 51

Soil water content

On quantifying soil water deficit of a partially wetted root zone by the response of canopy or leaf conductance, 65 (2004) 21

Soil water balance simulation of alfalfa (*Medicago sativa* L.) in the semiarid Chinese Loess Plateau, 69 (2004) 101

Soil water content estimation

Evaluation of pedotransfer functions in predicting the soil water contents at field capacity and wilting point, (70) (2004) 83

Soil water deficit (SWD)

Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107

On quantifying soil water deficit of a partially wetted root zone by the response of canopy or leaf conductance, 65 (2004) 21

Soil water retention

Alternative cropping strategies for assured and efficient crop production in upland rainfed rice areas of eastern India based on rainfall analysis, 67 (2004) 47

Soil water stress

Interactive effects of elevated CO₂, nitrogen and drought on leaf area, stomatal conductance, and evapotranspiration of wheat, 67 (2004) 221

Soil water transport

Simulation of water dynamics and irrigation scheduling for winter wheat and maize in seasonal frost areas, 68 (2004) 117

SOILPAR2 software

Evaluation of pedotransfer functions in predicting the soil water contents at field capacity and wilting point, (70) (2004) 83

Sorghum

Effect of cultural practices on soil properties, moisture conservation and grain yield of winter sorghum (*Sorghum bicolor* L. Moench) in semi-arid tropics of India, 64 (2004) 49

Effect of soil and water conservation and nutrient management on the soil-plant water balance in semi-arid Burkina Faso, 65 (2004) 103

South-western France

Estimating irrigation demand for water management on a regional scale. I. ADEAUMIS, a simulation platform based on bio-decisional modelling and spatial information, 68 (2004) 207

Estimating irrigation demand for water management on a regional scale. II. Validation of ADEAUMIS, 68 (2004) 233

Sowing date

Water use efficiency of winter-sown chickpea under supplemental irrigation in a mediterranean environment, 66 (2004) 163

Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

Spatial interpolation

Agricultural water use estimation using geospatial modeling and a geographic information system, 67 (2004) 185

Spatial scales

Adaptation to climate change to enhance food security and preserve environmental quality: example for southern Sri Lanka, 66 (2004) 15

Sporobolus airoides

Evaluation of salt-tolerant forages for sequential water reuse systems. I. Biomass production, (70) (2004) 109

Spring wheat

Dry-period irrigation and fertilizer application affect water use and yield of spring wheat in semi-arid regions, 65 (2004) 133

Effect of the niche-fitness at different water supply and fertilization on yield of spring wheat in farmland of semi-arid areas, 67 (2004) 1

Irrigation and fertilizer effects on water use and yield of spring wheat in semi-arid regions, 67 (2004) 35

Effects of irrigation before sowing and plastic film mulching on yield and water uptake of spring wheat in semiarid Loess Plateau of China, 67 (2004) 77

Stomatal conductance

On quantifying soil water deficit of a partially wetted root zone by the response of canopy or leaf conductance, 65 (2004) 21

Interactive effects of elevated CO₂, nitrogen and drought on leaf area, stomatal conductance, and evapotranspiration of wheat, 67 (2004) 221

Stone row

Effect of soil and water conservation and nutrient management on the soil-plant water balance in semi-arid Burkina Faso, 65 (2004) 103

Subsurface drainage

Performance of subsurface drains for reclaiming waterlogged saline lands under rolling topography in Tungabhadra irrigation project in India, 69 (2004) 69

Sulfur

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 121

Evaluation of salt-tolerant forages for sequential water reuse systems, (70) (2004) 137

Summer squash

Irrigation frequency and amount affect yield components of summer squash (*Cucurbita pepo* L.), 67 (2004) 63

Supplemental irrigation

The role of supplemental irrigation and nitrogen in producing bread wheat in the highlands of Iran, 65 (2004) 225

Water use efficiency of winter-sown chickpea under supplemental irrigation in a mediterranean environment, 66 (2004) 163

Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

The effect of supplemental irrigation on watermelon (*Citrullus lanatus*) production in gravel and sand mulched fields in the Loess Plateau of northwest China, 69 (2004) 29

Surface irrigation

Impact of drip and surface irrigation on growth, yield and WUE of capsicum (*Capsicum annum* L.), 65 (2004) 121

Surface treatments

Runoff characteristics of artificial catchment materials for rainwater harvesting in the semiarid regions of China, 65 (2004) 211

Surface water hydrology

Diffusive tank model application in rainfall-runoff analysis of upland fields in Taiwan, (70) (2004) 39

Survival

Assessing microbial pollution of rural surface waters.
A review of current watershed scale modeling approaches, (70) (2004) 1

Sustainability

Simulations on direct and cyclic use of saline waters for sustaining cotton–wheat in a semi-arid area of north-west India, 66 (2004) 153

Tanzania

Entrenched views or insufficient science?. Contested causes and solutions of water allocation; insights from the Great Ruaha River Basin, Tanzania, 69 (2004) 135

TDS

Vulnerability of groundwater resources from agricultural activities in southern Kuwait, 64 (2004) 1

Temporal variation

Spatial and temporal variations of water quality in drainage ditches within vegetable farms and citrus groves, 65 (2004) 39

Tensiometers

Scheduling water application on drip irrigated sugarcane, 64 (2004) 169

Tertiary rehabilitation

Seepage losses as affected by condition and composition of channel banks, 65 (2004) 145

The Chinese Loess Plateau

Soil water balance simulation of alfalfa (*Medicago sativa* L.) in the semiarid Chinese Loess Plateau, 69 (2004) 101

Thornthwaite approach

Adaptation of the Thornthwaite scheme for estimating daily reference evapotranspiration, 66 (2004) 251

Threshold rainfall

Runoff characteristics of artificial catchment materials for rainwater harvesting in the semiarid regions of China, 65 (2004) 211

Time-domain reflectometry

Changes in seasonal evapotranspiration, soil water content, and crop coefficients in sugarcane, cassava, and maize fields in Northeast Thailand, 67 (2004) 133

Total head loss

Field research on the performance of various drainage materials in Lithuania, 68 (2004) 151

Transpiration

On quantifying soil water deficit of a partially wetted root zone by the response of canopy or leaf conductance, 65 (2004) 21

Transport

Assessing microbial pollution of rural surface waters.
A review of current watershed scale modeling approaches, (70) (2004) 1

Treated effluent

Influence of rootstock, irrigation level and recycled water on growth and yield of Soutanina grapevines, 69 (2004) 13

Turfgrass

Growth response of four turfgrass species to salinity, 66 (2004) 97

Two-stage rainwater conservation

Productivity enhancement through rice–fish farming using a two-stage rainwater conservation technique, 67 (2004) 119

Two-year return period

Assessment of evapotranspiration estimation models for use in semi-arid environments, 64 (2004) 91

Unsaturated hydraulic conductivity

Unsaturated flow of different quality irrigation waters through clay, clay loam and silt loam soils and its dependence on soil and solution parameters, 64 (2004) 69

Upflow

Sugarcane water use from shallow water tables: implications for improving irrigation water use efficiency, 65 (2004) 1

Upland field

- Diffusive tank model application in rainfall-runoff analysis of upland fields in Taiwan, (70) (2004) 39

Upland rice ecosystem

- Alternative cropping strategies for assured and efficient crop production in upland rainfed rice areas of eastern India based on rainfall analysis, 67 (2004) 47

Uzbekistan

- Using remote sensing data for water depletion assessment at administrative and irrigation-system levels: case study of the Ferghana Province of Uzbekistan, 64 (2004) 183

Validation

- Effective management of irrigation water for maize under stressed conditions, 66 (2004) 181

Valley bottoms

- Performance of subsurface drains for reclaiming waterlogged saline lands under rolling topography in Tungabhadra irrigation project in India, 69 (2004) 69

Vegetation index

- Relationships among the leaf area index, moisture availability, and spectral reflectance in an upland rice field, 69 (2004) 83

Wastewater treatment

- Water resources management in Crete (Greece) including water recycling and reuse and proposed quality criteria, 66 (2004) 35

Water

- Assessment of irrigation and environmental quality at the hydrological basin level, (70) (2004) 195

Water balance

- Sugarcane water use from shallow water tables: implications for improving irrigation water use efficiency, 65 (2004) 1
- Effective management of irrigation water for maize under stressed conditions, 66 (2004) 181
- Evaluation of an enclosed portable chamber to measure crop and pasture actual evapotranspiration at small scale, 67 (2004) 15

- Irrigation scheduling of confectionery groundnut (*Arachis hypogaea* L.) in Senegal using a simple water balance model, 67 (2004) 201

- Mechanical control of shrubs in a semiarid region of Argentina and its effect on soil water content and grassland productivity, 68 (2004) 185

Water conservation

- Water balance and irrigation performance analysis: La Violada irrigation district (Spain) as a case study, 64 (2004) 123

- Seepage losses as affected by condition and composition of channel banks, 65 (2004) 145

Water content reflectometer (WCR)

- Dielectric coated water content reflectometer for improved monitoring of near surface soil moisture in heavily fertilized paddy field, 64 (2004) 161

Water cost

- Evaluation of the water cost effect on water resource management: Application to typical crops in a semiarid region, 66 (2004) 125

Water delivery performance

- Performance of water delivery system at tertiary canal level: a case study of the Menemen Left Bank Irrigation System, Gediz Basin, Turkey, 65 (2004) 155

Water depletion

- Using remote sensing data for water depletion assessment at administrative and irrigation-system levels: case study of the Ferghana Province of Uzbekistan, 64 (2004) 183

Water dispute

- Agricultural water use estimation using geospatial modeling and a geographic information system, 67 (2004) 185

Water harvesting

- The effect of supplemental irrigation on watermelon (*Citrullus lanatus*) production in gravel and sand mulched fields in the Loess Plateau of northwest China, 69 (2004) 29

Water losses

- Seepage losses as affected by condition and composition of channel banks, 65 (2004) 145

Water management

- Seepage losses as affected by condition and composition of channel banks, 65 (2004) 145
- The policy relevance of virtual water can be enhanced by considering comparative advantages, 66 (2004) 49
- Estimating irrigation demand for water management on a regional scale. I. ADEAUMIS, a simulation platform based on bio-decisional modelling and spatial information, 68 (2004) 207
- Estimating irrigation demand for water management on a regional scale. II. Validation of ADEAUMIS, 68 (2004) 233

Water policy

- The policy relevance of virtual water can be enhanced by considering comparative advantages, 66 (2004) 49

Water productivity

- Examining traditional irrigation methods, irrigation scheduling and alternate furrows irrigation on vertisols in northern Ethiopia, 64 (2004) 17
- Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

Water quality

- Vulnerability of groundwater resources from agricultural activities in southern Kuwait, 64 (2004) 1
- Spatial and temporal variations of water quality in drainage ditches within vegetable farms and citrus groves, 65 (2004) 39
- Emitter and filter tests for wastewater reuse by drip irrigation, 68 (2004) 135
- Assessing microbial pollution of rural surface waters. A review of current watershed scale modeling approaches, (70) (2004) 1
- Temporal variations in water quality of farm dams: impacts of land use and water sources, (70) (2004) 151

Water recycling

- Water resources management in Crete (Greece) including water recycling and reuse and proposed quality criteria, 66 (2004) 35

Water reform

- Modelling the regional and farm-level economic impacts of environmental flows for regulated rivers in NSW, Australia, 66 (2004) 77

Water resource conservation

- Estimation of evapotranspiration, transpiration ratio and water-use efficiency from a sparse canopy using a compartment model, 65 (2004) 173

Water resources management

- A GIS-based model to estimate the regionally distributed drought water demand, 66 (2004) 1

Water resources planning

- Seepage losses as affected by condition and composition of channel banks, 65 (2004) 145
- Agricultural water management in a humid region: sensitivity to climate, soil and crop parameters, (70) (2004) 51

Water salinity

- Growth response of four turfgrass species to salinity, 66 (2004) 97

Water saving

- Effect of water-saving irrigation on rice yield and water use in typical lowland conditions in Asia, 65 (2004) 193
- Partial rootzone drying is a feasible option for irrigating processing tomatoes, 68 (2004) 195

Water scarcity

- Review of measured crop water productivity values for irrigated wheat, rice, cotton and maize, 69 (2004) 115
- Analysis of irrigation systems and irrigation strategies for durum wheat in Tunisia, (70) (2004) 19

Water stress

- Evaluation of a crop water stress index for detecting water stress in winter wheat in the North China Plain, 64 (2004) 29
- Yield response of greenhouse grown tomato to partial root drying and conventional deficit irrigation, 69 (2004) 191

Water use

- Effect of the niche-fitness at different water supply and fertilization on yield of spring wheat in farmland of semi-arid areas, 67 (2004) 1
- Irrigation and fertilizer effects on water use and yield of spring wheat in semi-arid regions, 67 (2004) 35
- Effects of irrigation before sowing and plastic film mulching on yield and water uptake of spring wheat in semiarid Loess Plateau of China, 67 (2004) 77

Water use efficiency (WUE)

Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107

Effect of soil and water conservation and nutrient management on the soil-plant water balance in semi-arid Burkina Faso, 65 (2004) 103

Dry-period irrigation and fertilizer application affect water use and yield of spring wheat in semi-arid regions, 65 (2004) 133

The role of supplemental irrigation and nitrogen in producing bread wheat in the highlands of Iran, 65 (2004) 225

Water use efficiency of winter-sown chickpea under supplemental irrigation in a mediterranean environment, 66 (2004) 163

Effective management of irrigation water for maize under stressed conditions, 66 (2004) 181

Production and quality of the onion crop (*Allium cepa* L.) cultivated under controlled deficit irrigation conditions in a semi-arid climate, 68 (2004) 77

Lentil production under supplemental irrigation in a Mediterranean environment, 68 (2004) 251

The effect of supplemental irrigation on watermelon (*Citrullus lanatus*) production in gravel and sand mulched fields in the Loess Plateau of northwest China, 69 (2004) 29

Evapotranspiration of flood-irrigated pecans, 69 (2004) 179

Yield response of greenhouse grown tomato to partial root drying and conventional deficit irrigation, 69 (2004) 191

Water User Association

Comparative analysis of performance criteria in irrigation schemes: a case study of Gediz river basin in Turkey, 66 (2004) 259

Water vapor transfer

Effects of gravel mulch on water vapor transfer above and below the soil surface, 67 (2004) 145

Water yield-storage capacity ratio

Integrated farming approach for runoff recycling systems in humid plateau areas of eastern India, 64 (2004) 197

Watersheds

Assessing microbial pollution of rural surface waters. A review of current watershed scale modeling approaches, (70) (2004) 1

Weather data

Assessment of evapotranspiration estimation models for use in semi-arid environments, 64 (2004) 91

Weir height

Productivity enhancement through rice-fish farming using a two-stage rainwater conservation technique, 67 (2004) 119

Wetting front advancement

Unsaturated flow of different quality irrigation waters through clay, clay loam and silt loam soils and its dependence on soil and solution parameters, 64 (2004) 69

Wheat

Review of measured crop water productivity values for irrigated wheat, rice, cotton and maize, 69 (2004) 115

Willingness to pay

Measuring the willingness of farmers to pay for groundwater in the highland areas of Jordan, 68 (2004) 61

Wilting point

Evaluation of pedotransfer functions in predicting the soil water contents at field capacity and wilting point, (70) (2004) 83

Wind drift and evaporation losses

Characterizing pivot sprinklers using an experimental irrigation machine, (70) (2004) 177

Winter wheat

Evaluation of a crop water stress index for detecting water stress in winter wheat in the North China Plain, 64 (2004) 29

Effect of soil water deficit on evapotranspiration, crop yield, and water use efficiency in the North China Plain, 64 (2004) 107

Yield

Impact of drip and surface irrigation on growth, yield and WUE of capsicum (*Capsicum annum* L.), 65 (2004) 121

Effect of irrigation on fruit production in blueberry, 67 (2004) 173

Partial rootzone drying is a feasible option for irrigating processing tomatoes, 68 (2004) 195

The effect of supplemental irrigation on watermelon (*Citrullus lanatus*) production in gravel and sand mulched fields in the Loess Plateau of northwest China, 69 (2004) 29

Yield

Yield and physiological traits of prickly pear cactus 'nopal' (*Opuntia* spp.) cultivars under drip irrigation, (70) (2004) 97
